Also this revised plat shows the irrigable areas and land classes for each farm unit of the block as designated and established by the Regional Director, Region I, Bureau of Reclamation, for and behalf of the Secretary of the Interior.

The General Map sheets show in tabular form, the irrigable area in each farm unit by classes of land and the portions within each farm unit required for rights-of-way or designated Class 6 (non-irrigable), or "high". The irrigable areas and land classes indicated in the tabulation on the maps were established and fixed on 19 , by the Regional Director, Region I, Bureau of Reclamation, for and on behalf of the Secretary of the Interior for each farm unit in the Block for purposes of water service charges and project construction repayment as provided for in the repayment contract of October 9, 1945, as amended between The United States of America and the Quincy Columbia Basin Irrigation District, recorded in Grant County, Washington in Volume of Columbia Basin Documents, pages 1 to 16, inclusive.

In considering these revisions, investigations and studies were made of the lands in the block and the project as a whole with the object of determining the area, shape and boundaries of the various farm units in this block, having in mind the requirements of the Columbia Basin Project Act ( 57 Stat. 14 ) and of Chapter 275, Laws of Washington, 1943, as amended, and of the policies established thereunder by the Secretary of the Interior. Based on these studies and investigations and all relevant data brought forward since the filing of the farm unit plat, I find that the units as herein revised are of sufficient acreage for the support of an average-sized family at a suitable living level and have appropriate shapes and boundaries, having in mind the character of the soil, topography, location with respect to the irrigation system, and all other factors that are relevant to the determination of the area and boundaries of the farm units. Accordingly, acting pursuant to the authority delegated to the Commissioner of Reclamation by the Secretary of the Interior, as shown by Departmental Order 2765, dated July 30, 1954, and redelegated to me by the Commissioner of Reclamation by Commissioner's Order 34, dated October 6, 1954, and Commissioner's Order 34, Amendment I, dated October 29, 1954, all as recorded in the Auditor's office of Grant County, Washington, in Volume 2T of Columbia Basin Documents at page 699, and pursuant to the provisions of the Columbia Basin Project Act as amended, and Chapter 275, Laws of Washington, 1943, as amended, and the repayment contract of October 9, 1945, as amended, between The United States of America and the Quincy Columbia Basin Irrigation District, I hereby revise the farm unit plat of Irrigation Block 72, dated April 2, 1951, by (1) Replacing the General Map sheet of that plat with the General Map sheets of this plat and (2) Replacing supplemental sheet 15 of the plat revision filed August 26, 1957, supplemental sheet 11 of the plat revision filed August 31, 1959, supplemental sheet 1 of the plat revision filed August 24, 1960 and sheets 1, 3, 4, 5, 6, 8, 10, 11 and 13 of the plat revision filed August 15, 1961 as

revised with sheets 1 through 12 respectively, of this plat.
